Colour Coding Key:

Green indicates colleges which have above a defined percentage of population coverage across metered properties. An estimation of population coverage is made based on admission statistics found on the University of Cambridge website. This ensures a sufficient amount of the population from that college is represented.

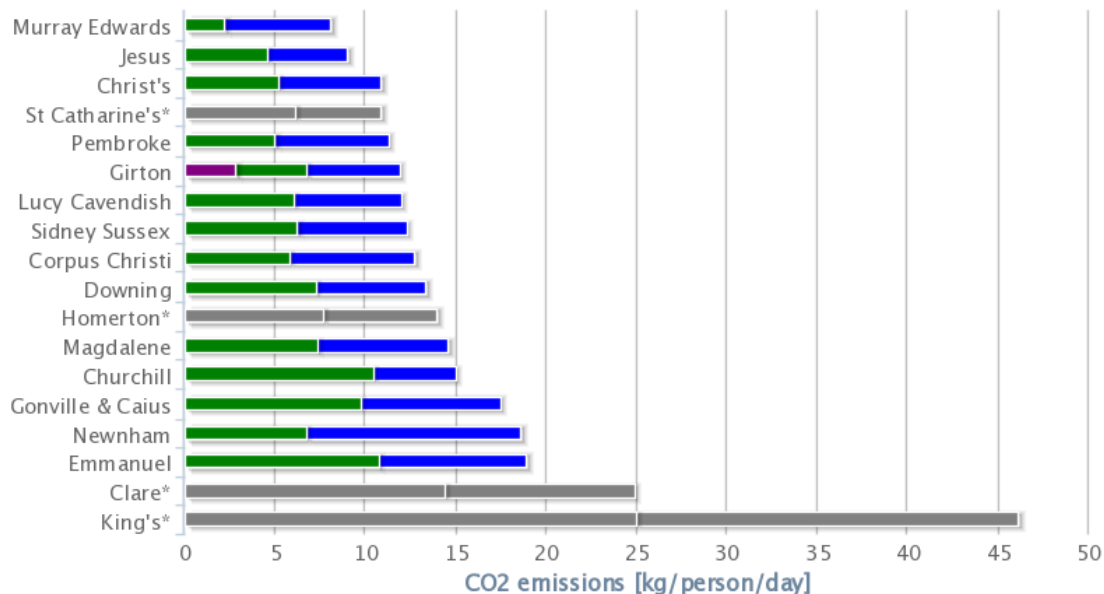

Electricity and Gas Rankings: 50% of estimated population

Water Ranking: 25% of estimated population (due to low prevalence of water metering)

Red indicates colleges which have the defined percentage of representation.
